

6 September 2021

Brian Restall
Senior Director
Quinnbrook Infrastructure Partners

Dear Brian

Close-out report on Fencing

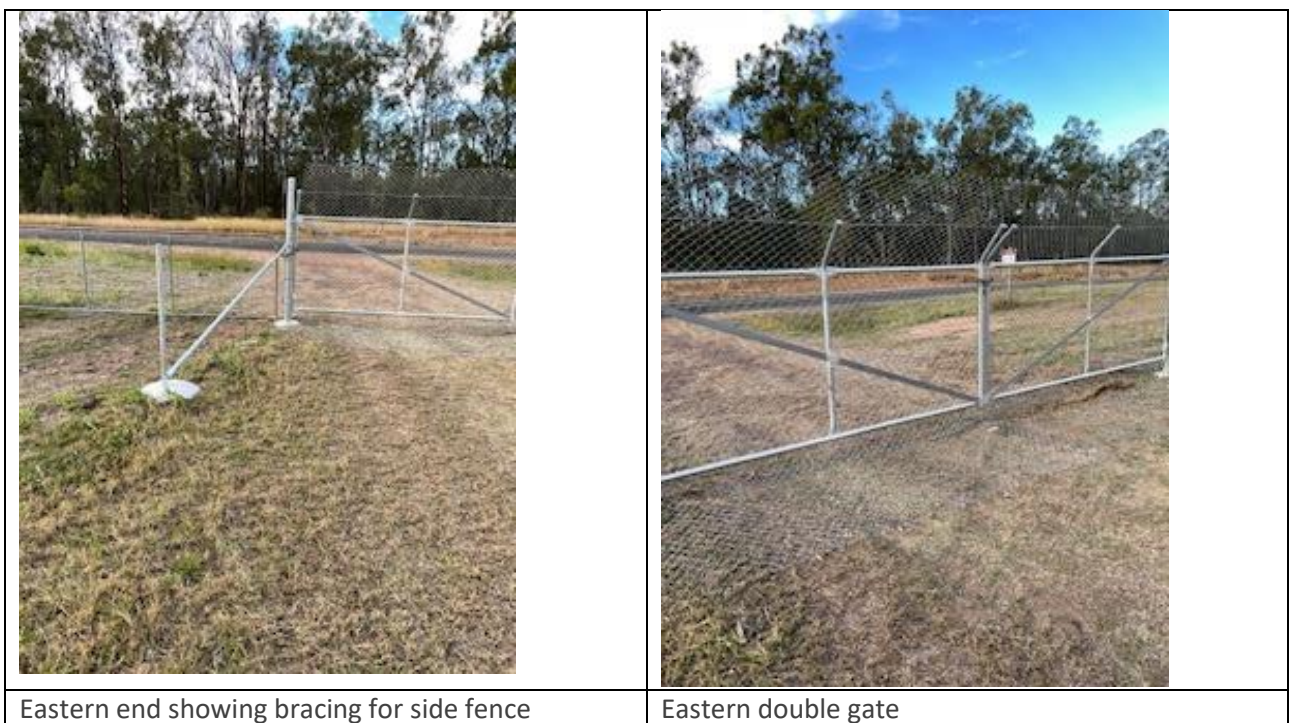

On 6th September 2021 I inspected the entirety of the fencing works which were completed on Friday 3rd September by Privacy Fencing.

All work was completed in accordance with the scope of the original quotation and purchase order, with subsequent approved amendments which included:

- a second 6m wide pair of gates in the south-eastern corner
- installation of a gravel bund to allow construction in the waterlogged area in the south western corner of the lot.

Fauna Exclusion Fence along Fords Road Boundary of Lot191 CSH2361.

A Fauna Exclusion fence has been installed along the southern boundary of the lot in accordance with NSW Road Transport Authority (RTA) standard drawing R0800-31, as specified in by **LRP02: Overall Layout Plan** in the **Amended Landscaping Plans**, which was approved by Lockyer Valley Regional Council on 5 May 2021.

View to west towards western gate

Western gate

View to west from bend in fence

View to east from western end of fence showing gravel bund

I have installed keyed-alike padlocks on front both gates.

Fauna friendly Fencing along the western, northern and eastern boundaries of Lot191 CSH2361

The top and bottom barb wires have been removed from all sections of these existing fences, and replaced with plain wire, all sections of the fences have been re-tensioned, and some existing wooden fence posts replaced or partnered with new star steel pickets. The timber post and diagonal bracing timbers at the north-western corner have been replaced.

New post and braces in northwest corner

Steel partner post installed to support existing post

New plain wires visible at top and bottom of existing post

Retensioned fence at southern end of western boundary

Hinged sections of colour-bond roofing have been installed across two deep gullies which enter the northern boundary, in order to exclude the entry of domestic livestock.

Hinged Colourbond panel to discourage livestock

Hinged Colourbond panel to discourage livestock

Removal of saplings to permit re-tensioning of fence along Rangers Road

On 26 August 2021 I installed a new padlock and chain onto the gate in the north-eastern corner of the lot, which opens out to Rangers Road, and a copy of that key is included in all keysets.

The wire fence across the gully along the eastern boundary fence has been reinstated and additional wires installed.

Other matters to note:

When convenient, a representative of APA Pipelines will meet me on site so that the APA padlock can be daisy-chained onto the chain on the right hand gate.

The padlock on the right had rear gate is separately keyed, as it is possible that this gate might be used by some future user or service provider to access the lot.

On the basis of all of the above, I recommend payment of the attached invoice No: 1208-1 (Privacy Fencing, \$ [REDACTED] plus GST, dated 3 September 2021.

Best wishes

Andrew Robson
